

The Young Man The Station: a LaTeX article template

The Young Man The Station is a LaTeX template built on top of the standard `article` class, and built on the notion that not all LaTeX-formatted papers need to use Computer Modern, be in two columns, or generally share the same old and tired look. The name of the template is a variation of a standard garden-path sentence [1]. You can find the LaTeX source at github.com/episanty/TheYoungManTheStation.

1 Introduction

This is a paragraph with some text at the start of the article. This is just a sample but it has some mathematics like $x = y^2 + A_{\text{eff}}$ and something else like $\hat{V}_L = \sum_j \mathbf{r}_j^k$. Then it just starts repeating itself. This is a paragraph with some text at the start of the article. Then it just starts repeating itself. This is just a sample but it has some mathematics like $\chi = a_d \xi \zeta / \lambda = m_{\text{eff}} d^2 / (\hbar^2 \lambda)$ and something else like $r = |\vec{x}_A - \vec{x}_B| = \sqrt{(x_A - x_B)^2 + (y_A - y_B)^2}$ or $d(p + A(t))^*$. Then it just starts repeating itself.

This is another paragraph with more text just to show paragraph breaks. This is really just filler text but to be honest including a whole paragraph of Lorem Ipsum here seemed a bit too much. So instead here is a bit of filler text to flesh out the paragraph a bit.

2 Here are some maths

Quisque ullamcorper placerat ipsum. Cras nibh. Morbi vel justo vitae lacus tincidunt ultrices. Lorem ipsum dolor sit amet, consectetur adipiscing elit. In hac habitasse platea dictumst. Integer tempus convallis augue. Etiam facilisis. Nunc elementum fermentum wisi. Aenean placerat. Ut imperdiet, enim sed gravida sollicitudin, felis odio placerat quam, ac pulvinar elit purus eget enim. Nunc vitae tortor. Proin tempus nibh sit amet nisl. Vivamus quis tortor vitae risus porta vehicula.

Here is a paragraph with a couple of citations: There is a paper [2], as well as a book [3], and the initial citation of some miscellaneous item [1].

Here's an equation with a label, (1) and there's more equations further down. So, we have

$$V(\mathbf{x}_A, \mathbf{x}_B) = V(\vec{x}_A, \vec{x}_B) = d^2 \frac{r^2 - 2\lambda^2}{(r^2 + \lambda^2)^{5/2}}, \quad (1)$$

being d a letter, λ a gathingammy r a letter in $r = |\vec{x}_A - \vec{x}_B| = \sqrt{(x_A - x_B)^2 + (y_A - y_B)^2}$, with A, B labels. Moreover $\Lambda = \lambda/a$, and $\chi = a_d/\lambda = m_{\text{eff}} d^2 / (\hbar^2 \lambda)$, with $m_{\text{eff}} = \hbar^2 / 2ta^2$, and t , are more maths expressions. So are $k = \sqrt{k_x^2 + k_y^2}$ and $V_{\text{latt}}(\vec{r}) = V_0 (\sin^2(k_x x) + \sin^2(k_y y))$, and a displayed equation is

$$(\hat{T}_A + \hat{T}_B + \hat{V}(\vec{x}_A, \vec{x}_B)) \Phi(\vec{x}_A, \vec{x}_B) = E \Phi(\vec{x}_A, \vec{x}_B). \quad (2)$$

As a side note, you can sometimes get some pretty persistent underfull box warnings (more

specifically, Underfull \vbox (badness 10000)) when there are displayed equations at the end of a page, so be careful with that if you're doing it. I'm not sure if it's due to the class or something else, so for the moment it is only something to keep an eye on.

Other displayed equations are

$$(\vec{\xi}_{\vec{K}} \cdot \vec{T}_D + V(\vec{r}))\psi(\vec{r}) = E\psi(\vec{r}), \quad (3)$$

where $\vec{\xi}_{\vec{K}} = -2t(\cos(K_x a/2), \cos(K_y a/2))$ and $\vec{I} \cdot \vec{T}_D \psi(\vec{r}) = \sum_{i=x,y} (\psi(\vec{r} + \vec{\delta}_i) + \psi(\vec{r} - \vec{\delta}_i))$, where $\vec{\delta}_i = a\hat{e}_i$, and also

$$\psi(\vec{r}) = \frac{1}{N_x N_y} \sum_{\vec{q}} \psi(\vec{q}) e^{i\vec{q} \cdot \vec{r}}. \quad (4)$$

Here's a little bit of text to round out the paragraph after the equation and (probably) round out the page, so this needs to be a couple of lines long.

Here some text: Sed commodo posuere pede. Mauris ut est. Ut quis purus. Sed ac odio. Sed vehicula hendrerit sem. Duis non odio. Morbi ut dui. Sed accumsan risus eget odio. In hac habitasse platea dictumst. Pellentesque non elit. Fusce sed justo eu urna porta tincidunt. Mauris felis odio, sollicitudin sed, volutpat a, ornare ac, erat. Morbi quis dolor. Donec pellentesque, erat ac sagittis semper, nunc dui lobortis purus, quis congue purus metus ultricies tellus. Proin et quam. Class aptent taciti sociosqu ad litora torquent per conubia nostra, per inceptos hymenaeos. Praesent sapien turpis, fermentum vel, eleifend faucibus, vehicula eu, lacus.

Some text, then some more equations: these ones are

$$E_{\vec{K}, \vec{q}} = -4t(\cos(K_x a/2) \cos(q_x a) + \cos(K_y a/2) \cos(q_y a))$$

and

$$(E - E_{\vec{K}, \vec{q}})\psi(\vec{q}) = \sum_{\vec{q}'} V(\vec{q} - \vec{q}')\psi(\vec{q}'). \quad (5)$$

To round out the paper, we now include a bunch of Lorem Ipsum paragraphs, some more math, more filler text, and call it a day.

Lorem ipsum dolor sit amet, consectetur adipiscing elit. Ut purus elit, vestibulum ut, placerat ac, adipiscing vitae, felis. Curabitur dictum gravida mauris. Nam arcu libero, nonummy eget, consectetur id, vulputate a, magna. Donec vehicula augue eu neque. Pellentesque habitant morbi tristique senectus et netus et malesuada fames ac turpis egestas. Mauris ut leo. Cras viverra metus rhoncus sem. Nulla et lectus vestibulum urna fringilla ultrices. Phasellus eu tellus sit amet tortor gravida placerat. Integer sapien est, iaculis in, pretium quis, viverra ac, nunc. Praesent eget sem vel leo ultrices bibendum. Aenean faucibus. Morbi dolor nulla, malesuada eu, pulvinar at, mollis ac, nulla. Curabitur auctor semper nulla. Donec varius orci eget risus. Duis nibh mi, congue eu, accumsan eleifend, sagittis quis, diam. Duis eget orci sit amet orci dignissim rutrum.

Here $\vec{\xi}_{\vec{K}} = -2t(\cos(K_x a/2), \cos(K_y a/2))$ and $\vec{I} \cdot \vec{T}_D \psi(\vec{r}) = \sum_{i=x,y} \left(\psi(\vec{r} + \vec{\delta}_i) + \psi(\vec{r} - \vec{\delta}_i) \right)$, where $\vec{\delta}_i = a\hat{e}_i$, and also

$$\psi(\vec{r}) = \frac{1}{N_x N_y} \sum_{\vec{q}} \psi(\vec{q}) e^{i\vec{q} \cdot \vec{r}} \quad (6)$$

and

$$E_{\vec{K}, \vec{q}} = -4t \left(\cos(K_x a/2) \cos(q_x a) + \cos(K_y a/2) \cos(q_y a) \right)$$

and

$$(E - E_{\vec{K}, \vec{q}}) \psi(\vec{q}) = \sum_{\vec{q}'} V(\vec{q} - \vec{q}') \psi(\vec{q}'). \quad (7)$$
